

DIGNESH SOLANKI

Windsor, ON | (343) 889-1778 | solank86@uwindsor.ca | github.com/dignesh1207 | linkedin.com/in/dsolanki127

TECHNICAL SKILLS

Data & Analytics: SQL, MySQL, Python, Excel (data tracking, reporting, logs), data visualization, relational database design

Programming & Web: JavaScript, TypeScript, React.js, Next.js, Node.js, HTML, CSS, C, Java

Tools & Platforms: Git/GitHub, Azure, PostgreSQL, DevOps, Active Directory, Linux, macOS, Windows 10/11

EDUCATION

Bachelor of Science Honours – Computer Science, Software Engineering Co-op

Jan 2024 – May 2027

University of Windsor, Windsor, ON

Relevant Courses: Data Structures & Algorithms, Database Management, Object-Oriented Software Analysis, Software Development, Operating Systems

Certificate, Project Management Foundation

Sep 2023 – Dec 2023

University of Toronto, Mississauga, ON

Diploma, Computer Systems Technician

Sep 2019 – Apr 2021

Loyalist College, Belleville, ON

Relevant Courses: Database Management, Python Programming, Computer Networking, Web Development

EMPLOYMENT EXPERIENCE

IT Support Client Services — Part-Time

Jan 2026 – Present

University of Windsor, Windsor, ON

- Generated reports and maintained issue logs to track recurring IT problems, identifying patterns and informing support team priorities
- Used Excel to log and organize support data, hardware inventory, and account management records for library staff and patrons
- Administered user accounts and password resets through Active Directory; assisted with VM configuration and system upgrades

IT Support Client Services — Co-op

Apr 2025 – Dec 2025

University of Windsor, Windsor, ON

- Documented technical procedures and maintained structured issue logs; tracked recurring problems to surface trends and reduce resolution time
- Supported system upgrades, software deployments, and inventory management, using Excel-based tracking for asset and software records
- Provided technical support across hardware, software, and network issues; assisted with VM setup, access management, and Active Directory administration

PROJECTS

Auth-System | Full-Stack Authentication System

- Built a self-contained Next.js authentication system (no third-party auth library) implementing email/password auth, OAuth, and JWT sessions end-to-end
- Implemented secure credential handling with bcrypt password hashing, mandatory email verification, and single-use, hashed, expiring tokens for password resets
- Added OAuth sign-in via Google and GitHub using a manual, CSRF-protected authorization-code flow
- Designed JWT-based sessions with short-lived access tokens in HTTP-only cookies, middleware route protection, and rate limiting on auth endpoints; used Prisma with PostgreSQL

Fiscal | Personal Finance Dashboard (Hackathon Project)

- Built real-time expense tracking and budget management dashboard using Next.js, React, and TypeScript, translating financial data into actionable user insights
- Developed OSAP calculator and tax estimator features, demonstrating ability to transform complex requirements into data-driven tools
- Implemented client-side data persistence with complete user data privacy; delivered full working application within a tight hackathon timeline

Work Hours Tracker | Data Reporting Application

- Designed and built a browser-based application to collect, organize, and summarize weekly work hours across multiple people and workplaces
- Implemented dynamic calculations and weekly summary reports using JavaScript with structured input validation to ensure data accuracy
- Utilized browser Local Storage for persistent client-side data management, enabling ongoing data collection without a backend
